

# CENTADISC-T

ELECTRICALLY INSULATING. FOR EXTREME LOADS.

CENTADISC-T - uncompromising in terms of electrical insulation. Our overload coupling for applications in rail drives between e-motor and gear. Optimum adaption to each application ensures avoidance of damage caused by leakage or high frequency current.

Each coupling is an individual solution for customer specific unit combinations.

#### Features

- electrically insulating
- compact dimensions
- misalignment compensation
- low wear

#### Areas of application

-  Rail drives
